

ANTICIPATED MARKET INTRODUCTION IN 2027

UNPARALLELED FLEXIBILITY

Industry first trait stack with tolerance to **five herbicides**:

1. Glyphosate
2. Dicamba
3. Glufosinate
4. Mesotrione (NEW)*
5. 2,4-D (NEW)*

EXCELLENT YIELD POTENTIAL FROM INDUSTRY-LEADING GENETICS

Vyconic™ soybeans will feature top soybean genetics along with various beneficial agronomic characteristics to help deliver outstanding yield potential.

*Bolted tolerances are new to HT4 and were not included in previous generation.

No dicamba may be used in-crop with Vyconic™ soybeans, unless and until approved or specifically permitted, and no dicamba formulations are currently registered for such use. Please follow www.ourroundreadytend.com/pages/tendmax-updates.aspx for status updates. Dicamba may harm crops that are not tolerant to dicamba.

This product is not currently available for commercial sale or commercial planting. Commercialization is dependent on multiple factors, including successful conclusion of the regulatory process. The information presented herein is provided for educational purposes only.

Bayer is a member of Excellence Through Stewardship® (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all applicable regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS.

It is a violation of federal and state law to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of glyphosate, dicamba, glufosinate, mesotrione, or 2,4-D are being pursued for regulatory approval for in-crop use with Vyconic™ soybeans. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USES AND APPROVED FOR SUCH USE IN THE STATE OF APPLICATION. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with Vyconic™ soybeans.

Vyconic™ soybeans contains genes that confer tolerance to glyphosate, dicamba, glufosinate, mesotrione, or 2,4-D. Plants that are not tolerant to glyphosate, dicamba, glufosinate, mesotrione, or 2,4-D may be damaged or killed if exposed to those herbicides. Contact your seed brand dealer or refer to the Bayer Technology Use Guide for recommended weed control programs.
